

ITALTEX[®] WALLMASTER

Italtex Wallmaster is a cement based wall coating used for both interior and exterior wall cladding. It can be applied as a troweled coat or textured to create designer effects thus providing a beautiful finish

A bag of **Italtex Wallmaster N3** covers an area of 9-10sm² at a thickness of 3mm.

There are over 40 different colors available in hues of reds, greys, yellows & browns other shades can be manufactured on order.

Italtex Wallmaster N6 covers an area of 5sqm at a thickness of 6mm. The thickness allows textures to be etched onto the render & patterns cut to suit. Designer effects are limited to the creativity and imagination of the architect, interior designer, contractor or developer.

High Point Deko is among the top companies specializing in normal paints, textured decorative finishes, construction and renovation works, We also offer professional paint application and interior design services.

ITALTEX SKIM COAT
Multipurpose skimcoat Manufactured to provide high quality smooth Surface finish suitable for concrete /cement plastered interior & exterior surfaces of rendering & screed

ITALTEX Gypsum filler is gypsum-based setting material for bulk & secondary filling of plaster-board joints. A low shrinkage product for hand application, with 60 minutes working time. It can be used in stages 1 & 2 of the traditional 3-stage jointing process.

ITALTEX Gypsum produce a smooth, continuous, crack-resistant lining surface ready for priming & final decoration. A number of jointing specifications are available to suit the board type, site preference & method of application. When taping & jointing, **ITALTEX Gypsum** is suitable for application of the taping coat only. It sets to a hard finish & is ideal for use on plasterboard joints under **ITALTEX Gypsum**, Suitable to fix cornices.

THE PERFECT floor seal

ITALTEX GROUT

Italtex Grout is available in a range of colours & a convenient to use 3kg & 1kg bag.

Italtex Grout is used to fill the spaces between tiles and support them on the surface of installation.

Italtex Grout comes in various colors & shades, & it keeps your tile from expanding & shifting with the change in temperature & moisture level.

There are three traditional types of grout available for tile installation, as well as advanced formulas engineered for color consistency & durability. While you should always research a grout that caters to your specific project, the basic three types are cement, pre-mixed & epoxy.
